

FAMILY FUN INDOOR ACTIVITIES

Trash Robot

Find random items throughout your house that would typically be discarded as trash and create a robot.

Bake/Cook Together

An afternoon spent in the kitchen can support math and reading skills, as your kids help measure, mix, and create treats.

Treasure Hunt

Make an inventory of fun things, then hide them around the house. Next, give your kids the list. Have a prize for the winner!

Talent Show

Encourage your kids and their friends to demonstrate their greatest talents. You can even make it into a talent competition, with prizes.

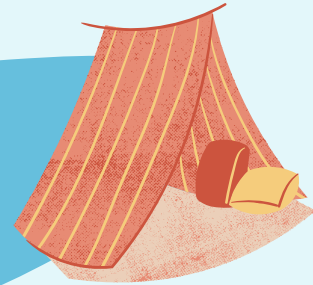

Paint Faces

Kids don't have to go to a fair for face painting. They can do it at home with simple kits.

Make a Fort

Kids love to enjoy their own secret places. Help them use a sheet, blanket, and other items to build a private 'fort'.

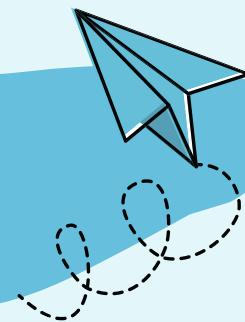

Decorate the Windows

Let your kids use washable window markers or peelable stickers to create their own images.

Paper Airplanes

Search online for different designs, then help your kids to cut, fold, and fly them to see which goes the furthest, highest, and so on.

Make Popsicles

Forget about store bought popsicles; you can help your kids make their own, using more nutritious ingredients with molds, sticks, juice, and fruit.
